

ScrollView

일반 View와 동일하게 잡으면 됨.
스크롤 가능하게 하고 싶은 부분을 지정.

Content View

예외사항! Leading, Trailing, Top, Bottom 각 마진을 모두 주고 + width, height까지 제공해야 함.

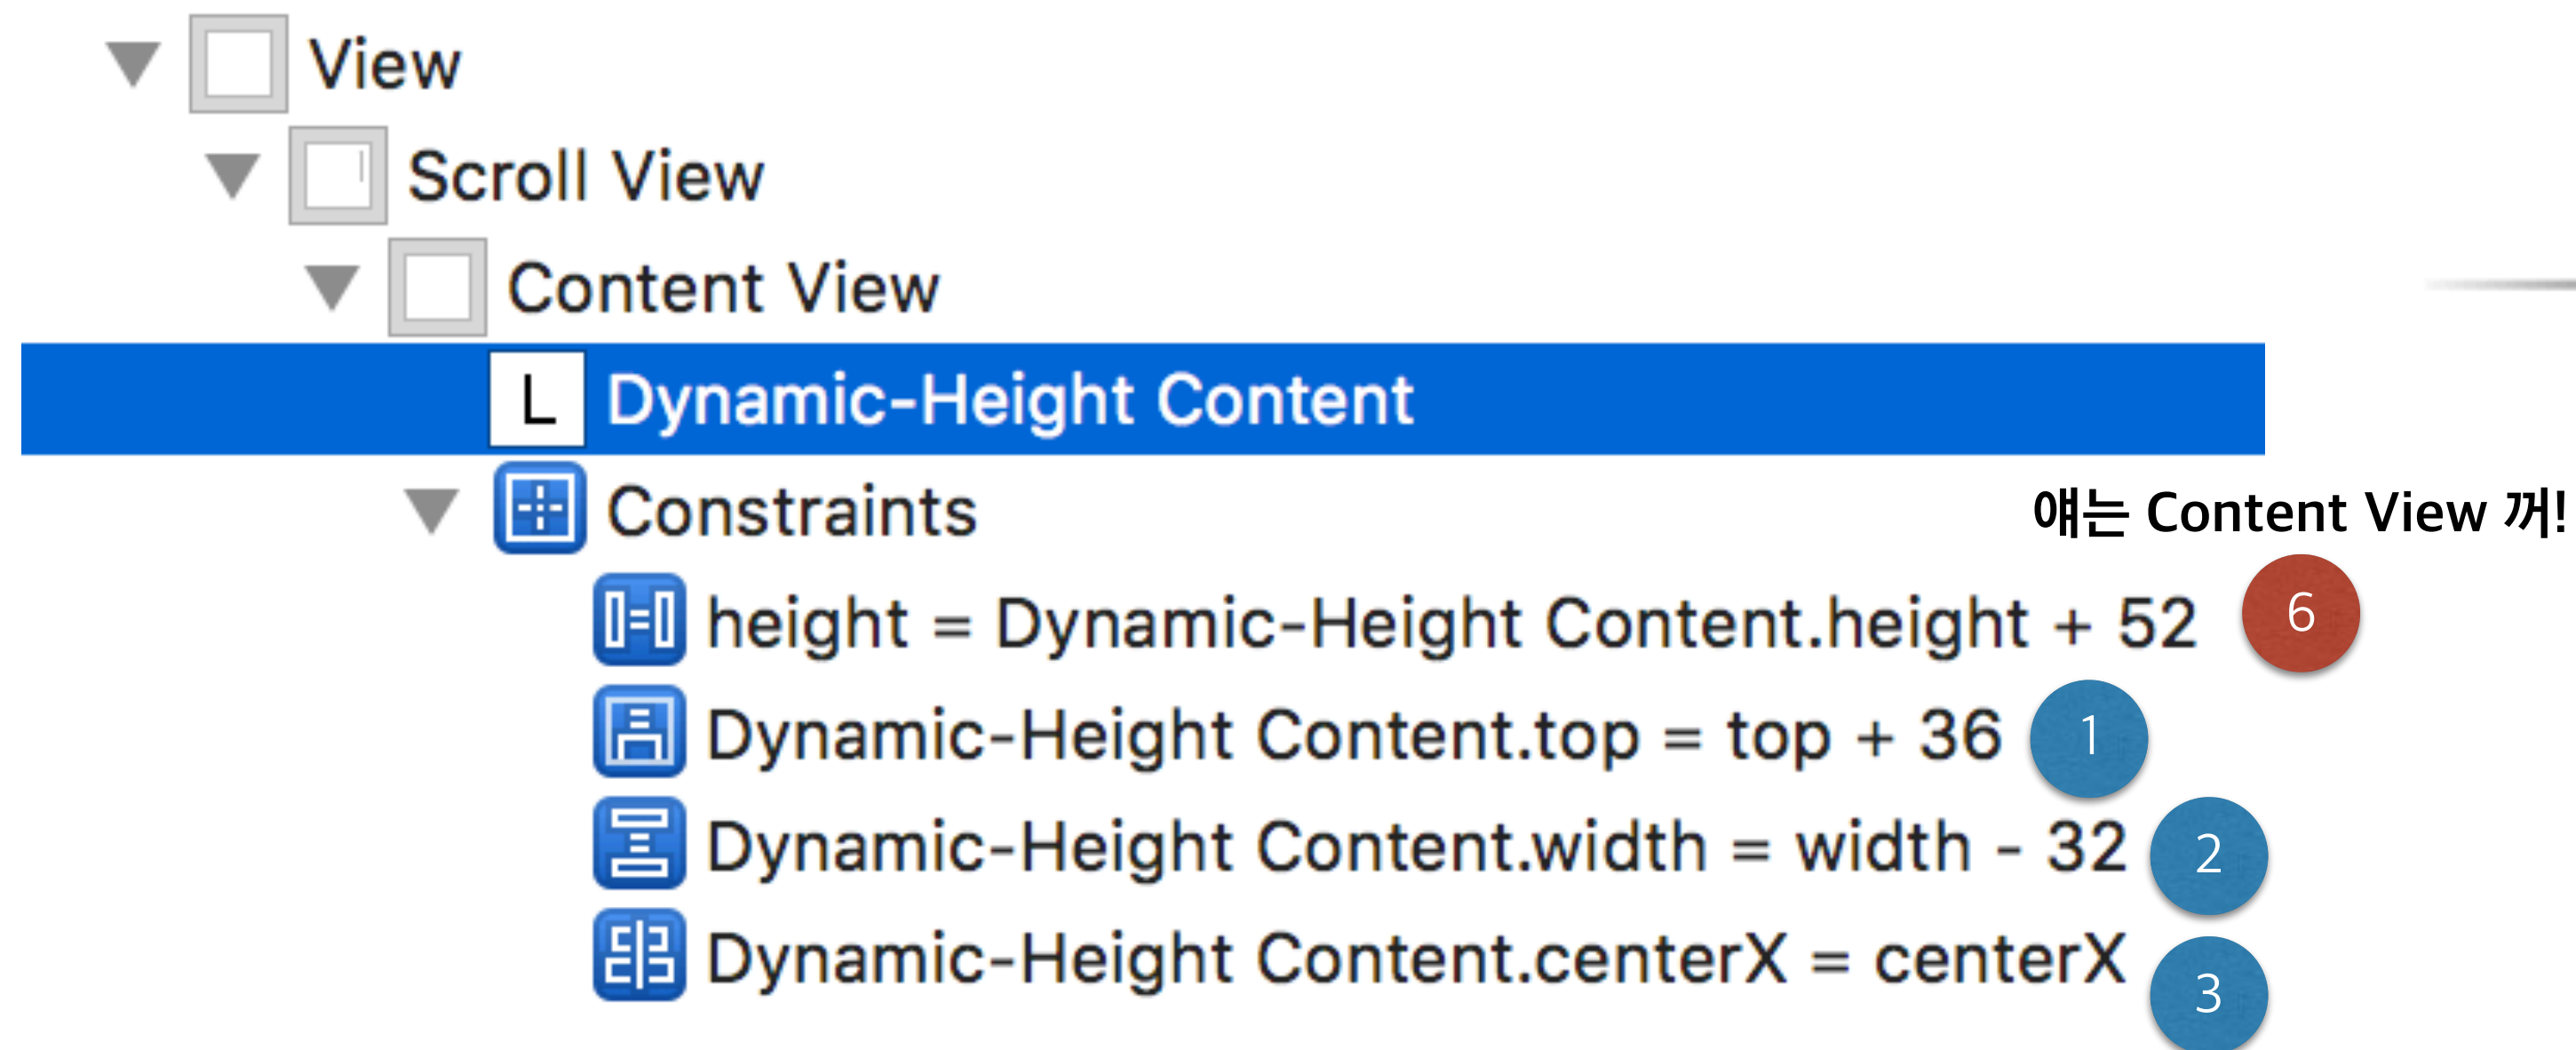

Dynamic-Height Content

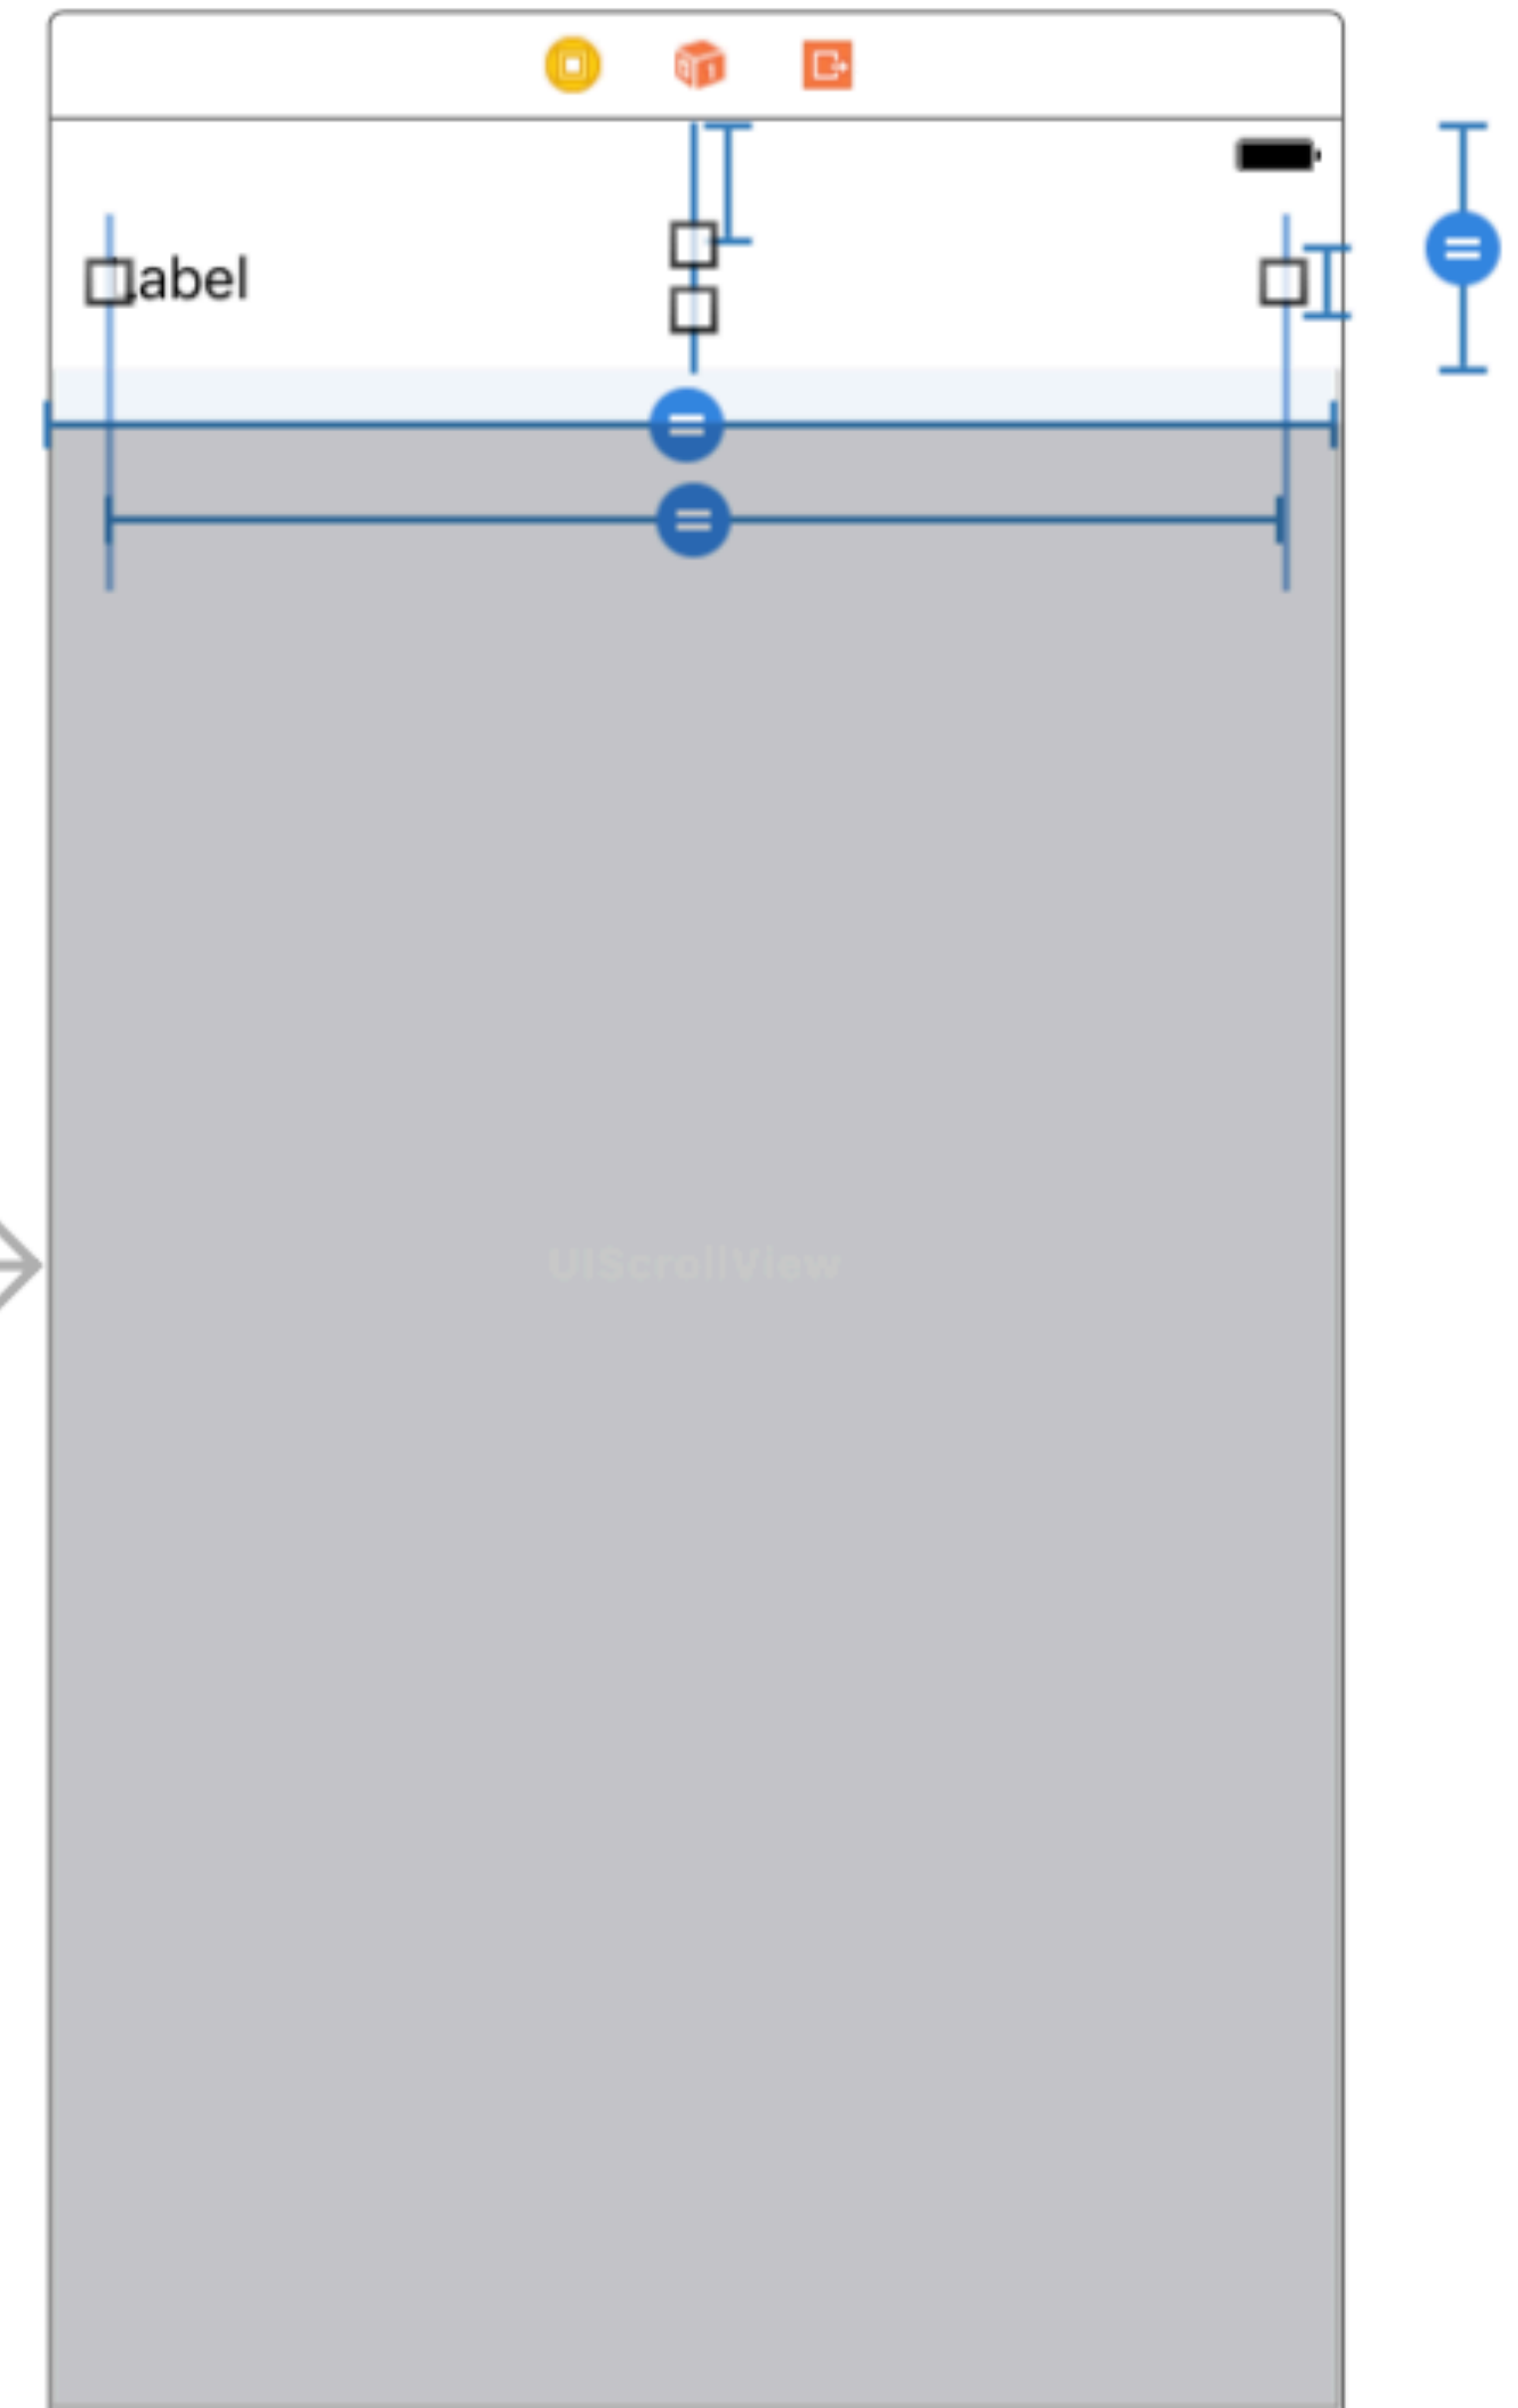

내용으로부터 스스로 height를 계산하는 뷰

(즉, 가로 위치와 넓이, 세로 위치까지만 줘도 파랑색.)

ex) UILabel, Vertical Stack View

!!! Content.Height를 삭제하고
내부의 Dynamic-Height Content로부터 height를 받아옴.

완성!
